

GLOBAL BUSINESS & TALENT
ATTRACTION TASKFORCE

AUSTRALIA

Australia is investing over **A\$1 billion** to turbocharge our waste and recycling industries

The Circular Economy

Australia is serious about reducing our waste and putting it to work.

We're determined to exceed our national target of reducing, and recycling 80% of our waste by 2030.

To do this we are:

- in a world first, banning the export of unprocessed **glass, plastic, tyres, paper and cardboard**
- investing more than A\$1 billion to turbocharge our **waste and recycling** industries
- supporting industry-led recycling schemes through the National Product Stewardship Investment Fund
- halving our **food waste** by 2030.

Support & Incentives

- Co-funding of up to 50% for projects to scale-up and commercialise waste reduction technologies through the A\$1.5 billion **Modern Manufacturing Strategy**
- Support from the A\$190 million **Recycling Modernisation Fund** and the A\$100 million **Australian Recycling Investment Fund**

Australia is committed to reprocessing *an additional* 645,000 tonnes of waste plastic, paper, glass and tyres each year. The **Recycling and Clean Energy National Manufacturing Priority** road map identifies growth opportunities in:

- recyclable products and packaging
- products from recycled feedstocks (such as plastic, organic waste or e-waste)
- cleaner feedstocks for remanufacturing (and enabling tech)
- recycling clean energy components (including PV panels, wind turbines and batteries).

The Taskforce is offering:

- Fast track visas
- Facilitated relocation of company executives, key staff and their families
- The certainty of permanent residency
- Tailored advice to help kick start your Australian success
- Connections to industry and professional networks
