

**“The Aussie tech scene is thriving. We’ve seen this growth firsthand. We started out as a team of just a few sitting around a single conference table. Today, we’ve grown to a team of more than 2,000 people from all over the world.**

Australia has quietly made a name for itself as a country of innovators. It was Aussie ingenuity that cooked up inventions including WiFi, the hearing aid and the pacemaker. To remain competitive and keep producing world-changing innovations, we need to continue attracting talent from every corner of the globe.

I have a sense that we’re just getting started. Australia is undoubtedly a great place to live, and it’s also a great place to start and scale a company.”
