

Global Talent Visa Program

This information is intended to provide prospective applicants and migration agents an indication of the calibre and specialisations that the Global Talent Visa Program seeks to attract.

Australia is seeking exceptionally talented individuals across a range of priority sectors who can demonstrate some of the following abilities:

- bring exceptional new skills and knowledge to Australia
- have the potential to make a significant economic impact
- have been recognised with international distinction as a leader in one of the priority sectors
- generate employment, particularly in areas that fill critical supply chain and talent gaps
- commercialise ideas at scale
- act as a connector between industries
- make an impact as an innovator or serial entrepreneur
- have the ability to attract a salary at or above the Fair Work high income threshold (AUD\$162,000)

Priority Sectors

- Advanced manufacturing
- Agri-food and AgTech
- Circular economy
- Defence
- Digitech
- Education
- **Energy**
- Financial services & FinTech
- Health industries
- Infrastructure and tourism
- Resources
- Space

Visa Requirements

- Be currently prominent and have an internationally recognised record of exceptional and outstanding achievement in one of Australia's priority sectors.
- Be nominated by an Australian citizen, an Australian permanent resident, an eligible New Zealand citizen, or an Australian organisation with a national reputation in the applicant's sector.
- Be an asset to the Australian community.
- Have the ability to establish themselves in Australia in a priority sector.
- Meet health, character and national security requirements.

Application process

- **Step one:** Submit an Expression of Interest using the online [Global Talent contact form](#).
- **Step two:** Once invited, apply for a visa online via [ImmiAccount](#).

Sector Overview—Energy

Australia is an energy sector superpower focussed on the future. Our policy framework is layered to encourage innovation, investment and improvement of technologies across industry.

We are looking for individuals that can drive forward this agenda by applying their skills in the development and extraction of energy and fuels from oil, gas, coal and uranium as well as hydrogen production and renewable energy technologies including solar and wind.

The following specialisations are intended to be used as a guide and are not an exhaustive list. The Global Talent Profile provides examples of the calibre of individuals who may meet program requirements.

Specialisations

- Advanced visualisation technology
- Artificial intelligence and machine learning technologies
- Automation and robotics (e.g. smart sorting technologies for recycling)
- Beneficiation technologies (i.e. improving the economic value of ore)
- Gas, natural gas and liquefied natural gas (LNG) development
- Traceability technologies (e.g. experience with sophisticated material trading systems that make material sources more transparent to consumers)
- Hydrogen technology
- Clean technologies, renewables and hybrids (including solar, wind and wave power)
- Battery/energy storage design (specialised, grid-scale and precursors for batteries)
- Bioenergy and biofuels
- Micro-grid design

Global Talent Profile

Exceptional candidates

- Founder and CEO of an internationally acclaimed start-up in the research and manufacturing of innovative clean technology for heating, ventilation and air conditioning.

Strong candidates

- Senior energy transformation engineering specialist in devising solutions for new energy technologies.
- Executive with expertise in the development and delivery of large energy projects.

The following experience or professions **would not** usually meet the parameters of the program:

- Technicians and construction workers
- Distribution and sales representatives
- Junior or mid-level power plant or mine operations managers
