# Advanced manufacturing: a future made in Australia

Australia is an innovation nation. We created the black box flight recorder, the electronic pacemaker and a cervical cancer vaccine to name just a few of our inventions that changed the world.

Now we're supercharging our manufacturing capability with an R&D-led expansion focusing on high-value sectors. We make things – and we make them really well. Come and join our success story.

**GLOBAL AUSTRALIA**

## Our manufacturing boom

**Our thriving and sustainable manufacturing sector employs one in every 16 Australian workers.**

One of our fastest growing export sectors, manufacturing produces more than A\$115 billion in annual output.

In 2021, the sector attracted A\$117 billion of international investment.

## Prioritising a bright future

**The Australian Government has announced it will establish a A\$15 billion National Reconstruction Fund to rebuild Australia's industrial base. The National Reconstruction Fund will include A\$1 billion in dedicated support for advanced manufacturing.**

This investment will create new capabilities and opportunities to innovate in transport, defence, resources, agricultural and food processing, medical science, renewables and low emission technologies manufacturing.

The Government's plan will give businesses access to capital to diversify operations, industrial processes, and use research and development to climb the technological ladder.

## Australia is your destination for high-value manufacturing

Australia is globally recognised for our reliability, our ingenuity and our quality products.

Australian manufacturers are highly sought after by large international companies including Boeing and BAE Systems for specialist aerospace components; Ford, General Motors, and Toyota in the automotive sector; BASF and DuPont in the chemicals industry; and Siemens in energy and water treatment technology.

## Partner with world-class researchers

The Commonwealth Science Industry Research Organisation (CSIRO), our national science agency, is recognised internationally for its quality research and is Australia's largest holder of patents. Its science and engineering skills, equipment and international connections are helping Australian manufacturers penetrate new markets and be environmentally sustainable. Discover what you can achieve with a partnership with CSIRO.

## Be part of our manufacturing success story

From manufacturing, research and design to logistics and after-sales service, we're looking for talented individuals and businesses to make an impact across the entire value chain.

Australian Government

## Australia is offering

- Fast track visas
- Facilitated relocation of company executives, key staff and their families
- The certainty of permanent residency
- Tailored advice to help kick start your Australian success
- Connections to industry and professional networks

## Who's eligible?

Highly skilled individuals with exceptional talent in their field, as well as Australian resident companies or foreign resident companies with a permanent base in Australia.
